AQUEOUS PARTS WASHERS
MADE IN THE USA!

There are many benefits to having a parts washer, and in this newsletter we will cover just a few of the reasons why you should invest in a Cuda Parts Washer and help your business to become even more efficient.

1

COST SAVINGS

Parts washers save businesses money on labor and cleaning supplies by reducing the amount of time and energy spent on manual scrubbing or wiping down surfaces. With a parts washer, you'll be able to clean faster and more

efficiently, resulting in lower costs over time. Plus, since parts washers use less water than traditional cleaning methods, businesses can cut down on their water bills as well.

2 SAFETY

Manual cleaning methods may require hazardous solvents or strong chemicals, which can put employees at risk for health issues due to prolonged exposure. With a parts washer from a reliable company like Cuda, you'll be able to safely and effectively remove dirt and grime without any harsh chemicals or solvents.

3 IMPROVED APPEARANCE

A good quality parts washer will produce cleaner results than manual scrubbing or wiping down surfaces with cloths, resulting in improved aesthetics for your pressure washer-related machines or equipment. This not only improves the overall look of your machines but also helps extend the life span of these items as dirt and debris build-up is minimized with regular cleaning from a parts washer device.

4 EASE OF USE

Parts Washers are incredibly easy to use and require minimal set-up time—simply turn it on and go! As a result, businesses can maximize productivity while still maintaining cleanliness standards within their facility.

5 VERSATILITY

It's worth noting that some modern parts washers come with added features like adjustable tanks so you can customize your cleaning process to suit your specific needs. This allows for ultimate versatility when it comes to tackling different types of projects quickly and efficiently!

READ OUR NEWEST BLOG

Are you in the market for parts washers and the soaps and accessories that go with them? H2O Power Equipment is here to help. We offer top-load and front-load washers from Cuda, along with a wide range of soaps, cleaners, and accessories tailored to your specific cleaning needs depending on the type and size of the components that you're washing.

When buying a parts washer, there are numerous considerations to take into account such as size, manual versus automatic cleaning, the number of parts you'll need to be cleaned, the types of parts you'll be cleaning, and the level of cleaning you'll require. Not all parts washers are equal and the detergents on the market today vary greatly, however, the team at H2O Power Equipment can educate and guide you to making the best purchase decision for your business needs.
