POWER EQUIPMENT

UNDER PRESSURE

WELCOME TO H2O POWER EQUIPMENT'S MONTHLY NEWSLETTER!

The end of the year is the best time to upgrade your equipment and save!

As the temperatures drop, the need for efficient and effective heating solutions increases. That's why we're excited to introduce our top-of-the-line radiant heaters, which are designed to provide a safe, odor-free, low-cost heat source to keep your commercial space warm and cozy.

We're also thrilled to share that Landa's financing offer has been extended through the end of the year!

Lastly, we'd like to remind you of the potential tax benefits of taking advantage of Section 179. This can help you save money and reinvest in your business, all while ensuring that your equipment is up-to-date and functioning at its best.

[Winterizing Your Pressure Washer: An Essential Guide for Long-term Use](#)

Winterizing your pressure washer is not just about preventing freezing and cracking of components. It's an essential maintenance step that helps prolong the lifespan of your machine, ensuring it continues to perform at its best when you need it most.

By winterizing, you're not merely storing your pressure washer but protecting and preserving it. You're preventing corrosion, protecting seals and gaskets, and ensuring that your washer is ready to take on the toughest cleaning jobs come spring without missing a beat.
