

UNDER PRESSURE

WELCOME TO H2O POWER EQUIPMENT'S MONTHLY NEWSLETTER!

Take Advantage of EnergyLogic's Trade-In Special!

As a savvy business owner, you're well aware of the significant impact energy bills can have on your bottom line, especially during colder months. While winter seems far away, now is the perfect time to take proactive measures to curb these expenses and ensure your business remains profitable year-round. While traditional heating methods can quickly eat into your budget, there's a more innovative, more cost-effective solution on the horizon: investing in a waste oil heater.

At H2O Power Equipment, we're proud to be partnering with EnergyLogic to give you up to \$2,000 back when you trade-in for a new waste oil heater! By investing in a waste oil heater now, you're not just making a smart move – you're laying the foundation for your business's long-term financial health and success.

Terms subject to change based on credit approval.

WHY INVEST IN A WASTE OIL HEATER?

Free Fuel Source:

Instead of disposing of this valuable resource, why not repurpose it to heat your facility? With a waste oil heater, you can harness waste oil, slashing your reliance on pricey traditional fuels like propane or natural gas.

Long-Term Savings:

Depending on your waste oil output, you could run your waste oil heater for months without purchasing additional fuel. You can recoup your initial investment in a waste oil heater in as little as a year!

Energy Efficient:

EnergyLogic waste oil heaters boast superior energy efficiency, ensuring optimal performance while minimizing your carbon footprint.

Reliable & Durable

EnergyLogic waste oil heaters are renowned for their durability and low-maintenance design. They can burn both conventional and synthetic oils, offering unparalleled versatility and reliability, even in the harshest industrial environments.

WASTE OIL BOILERS: A SMART SOLUTION

While waste oil heaters are a popular choice for many businesses looking to maximize cost savings and efficiency, waste oil boilers offer a range of additional benefits that make them a compelling option for heating more extensive facilities and operations.

Unlike waste oil heaters, primarily used for space heating, waste oil boilers are designed to generate heat and hot water, making them ideal for businesses with extensive heating needs or those that rely on hot water for various processes. By investing in a waste oil boiler, you can enjoy the benefits of reliable space heating and hot water production in a single, efficient system.
