### Heat Up Your Business with Waste Oil Heaters: A Smart, Eco-Friendly Choice

The “ber” months are the perfect time for your business to invest in cost-effective and energy-efficient ways to keep facilities warm. One solution that offers both sustainability and savings is the use of waste oil heaters. These heaters are specifically designed to burn used oil, turning what would typically be a waste product into a valuable heat source.

For businesses that generate used oil—such as automotive repair shops, service centers, and industrial facilities—waste oil heaters can significantly cut heating costs while providing an eco-friendly solution. With proper maintenance, they offer long-term durability and can save businesses thousands of dollars in heating costs over time.

# Colorado's LARGEST Pressure Washer Superstore!

Serving Denver, Grand Junction/Western Slope,  
and Colorado Springs/Pueblo

## BENEFITS OF WASTE OIL HEATERS FOR YOUR BUSINESS

### Cost Savings:

Waste oil heaters offer significant cost savings by turning used oil, which would otherwise require disposal, into free heat for your facility. Instead of paying to have your used oil hauled away, you can recycle it directly into a valuable energy source. For businesses that generate large amounts of used oil, such as automotive shops or industrial facilities, this can translate to thousands of dollars saved each year, making waste oil heaters an incredibly cost-effective solution.

### Efficiency:

Waste oil heaters are built for high-efficiency performance, ensuring maximum heat output from minimal fuel. They are designed to burn used oil cleanly and thoroughly, generating consistent heat that can effectively warm large spaces, from warehouses and garages to service centers and industrial buildings.

### Durability:

Built to withstand tough industrial environments, waste oil heaters are made from durable, heavy-duty materials that can handle years of continuous use. With regular maintenance, these heaters offer long-lasting performance, providing reliable heat year after year. Their robust construction ensures that your investment in a waste oil heater pays off in the long term, as these machines are built to last, reducing the need for frequent repairs or replacements. In short, they are a solid investment that delivers ongoing savings and reliable performance for your business.

# WHY ENERGYLOGIC?

EnergyLogic waste oil heaters and boilers are designed with businesses in mind, providing a range of features that enhance efficiency and cost savings. Whether you're looking to reduce energy expenses or make use of waste oil effectively, EnergyLogic products offer reliable, long-lasting solutions.

**Here's a breakdown of why EnergyLogic waste oil heaters and boilers are an excellent choice for your business:**

## ENERGYLOGIC WASTE OIL HEATERS

- **Maximum Efficiency:** Patented flame retention head technology ensures complete combustion and higher heat output with less waste.
- **Fuel Savings:** Reduced fuel consumption due to efficient heat output, lowering operational costs.
- **Adjustable Airflow:** Customizable heating to meet your businesses specific needs
- **Easy Maintenance:** Designed for easy cleaning and upkeep, reducing downtime and ensuring consistent performance.
- **Durable Construction:** Built to withstand the rigors of daily use, ensuring longevity and reliability.

## ENERGYLOGIC WASTE OIL BOILERS

- **Dual Functionality:** Provides both heat and hot water, making them ideal for larger facilities.
- **Rugged Steel Construction:** Industry-leading heat exchanger and durable design for long-lasting performance.
- **Fuel Flexibility:** Burns a wide variety of waste oils, including motor oil, hydraulic fluid, and transmission fluid.
- **Precision Engineering:** Maximizes fuel efficiency, saving on energy costs while reducing waste.
- **Advanced Automation:** Self-diagnostic controls for easier operation and maintenance.

## Maximize Your Year-End Savings with H2O Power Equipment

As the year comes to a close, it's the perfect time to consider upgrading your business equipment and taking advantage of significant tax savings through Section 179 of the IRS Tax Code. This provision allows businesses to deduct the full purchase price of qualifying equipment, like the high-quality industrial products from H2O Power Equipment, directly from their taxable income.

Investing in new equipment before the end of the year can reduce your tax liability and set your business up for success in the year ahead. From pressure washers to waste oil heaters, now is the time to invest in tools that will enhance your operations while taking advantage of Section 179 deductions. Read our full blog to learn how this opportunity can maximize your year-end savings and help your business grow!
