POWER EQUIPMENT

## WELCOME TO H2O POWER EQUIPMENT'S MONTHLY NEWSLETTER!

### POWERFUL CLEAN STARTS HERE

You wouldn't put low-grade fuel in high-performance machinery—same logic applies to your pressure washer. If you're not using the right chemicals, you're not cleaning efficiently, and worse—you could be damaging your equipment.

Here's how to protect your investment and get better cleaning results with H2O Power Equipment's proven chemical solutions.

**0% APR 12 MONTHS**

**LANDA**

Monthly price based on 60 month term. Available at participating dealers in the continental U.S. only. Financing offered through H2O Equipment Leasing (H2O EL). One dealer, in FL, is not financing. Dealer's choice. H2O EL is not a lender. All plans are subject to credit approval and terms. Rates are subject to change by dealer.

### 0% Financing Ends June 30—Act Now

Time's running out to take advantage of Landa's summer financing deal. Through June 30, get 0% interest for 12 months on qualifying industrial pressure washers from H2O Power Equipment.

These machines are built to work—day in, day out—blasting through grease, grime, and buildup in the toughest environments. Landa's machines deliver the durability and performance your business depends on.

## BEEN PUTTING OFF THAT EQUIPMENT UPGRADE?

*Now's the time to pull the trigger.*

When it comes to industrial cleaning, Landa pressure washers are in a league of their own. Built for heavy-duty use, Landa units combine rugged durability with cutting-edge engineering that delivers consistent, high-powered performance. From hot and cold water systems to trailer-mounted units, these machines are designed to handle the toughest jobs without breaking down.

### What sets Landa apart?

Advanced features like high-efficiency heating coils, belt- and direct-drive pump options, corrosion-resistant frames, and ETL safety certification. Whether you're washing down a fleet, degreasing machinery, or maintaining job sites, Landa pressure washers give you reliability, power, and the ROI serious operations demand.

If you've been holding off on a new pressure washer, trailer build, or bulk chemical order, this deal eliminates the excuse.

Get what your business needs now. Pay over time — interest-free.

**Offer ends June 30th. Don't miss it.**

## WHY CHEMICALS MATTER

Using the wrong soaps or detergents causes more than streaks. It corrodes coils, clogs nozzles, eats away seals, and kills pump life. According to industry experts, most repair issues trace back to improper chemical use.

We carry only equipment-safe, pressure-washer-approved chemicals that:

- **Rinse clean without leaving residue**
- **Won't corrode coils, hoses, or pump internals**
- **Maximize cleaning efficiency (less labor, less water)**

We stock high-performance solutions engineered for tough cleaning jobs:

### **DYNAMITE**

The ultimate industrial strength degreaser to attack grease/oil stains. Perfect for heavy machinery.

### **TAGINATOR**

Fast, safe graffiti removal. Specially formulated for both Masonry Surfaces and smooth/metal surfaces.

### **UBER WASH**

Fleet and vehicle wash, safe on paint. A customer favorite!

### **CONCRETE REMOVER**

Dissolves cured residue. Great for trucks, heavy equipment, and construction equipment.

### **FLEET ALUMINUM BRIGHTENER**

Restores aluminum without manual scrubbing.

# HARD WATER IS COSTING YOU

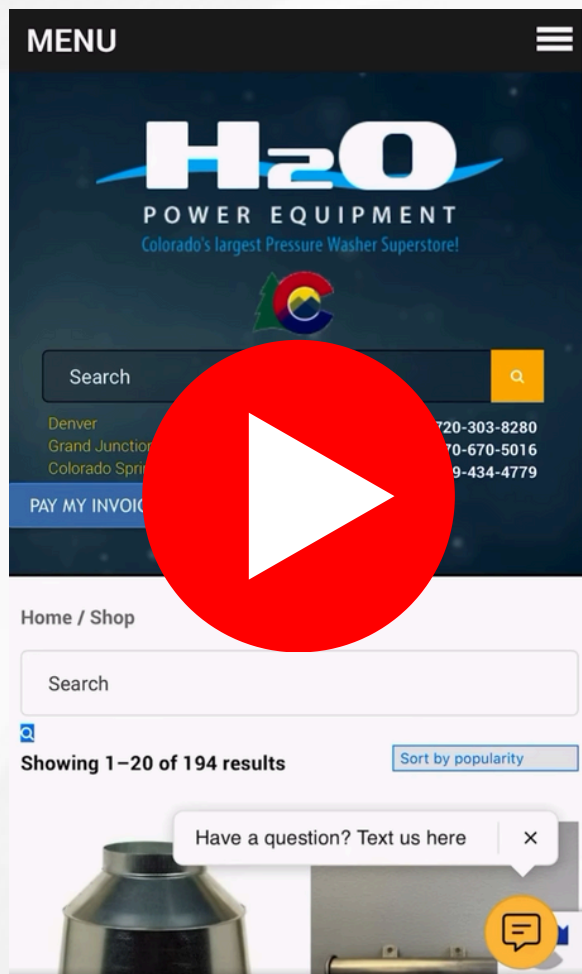

## *A properly sized softener gives your system a serious boost*

If your soap isn't foaming or you're seeing streaks and spots after rinsing, don't blame the detergent. Hard water is the real problem—and it's silently draining your efficiency and driving up repair costs.

### Pro Tips to Beat Hard Water:

- Test your water hardness. If you're over 5 GPG (grains per gallon), you're losing cleaning power.
- Use soft water to mix detergents. Even if you can't treat your whole system, softening just the supply for mixing chemicals makes a big difference.
- Descale regularly. If you're not ready for a softener, descaling coils and internals every few months is critical.
- Choose softener-safe chemicals. Some soaps are optimized for hard water, but results are always better with softened water.

## OFF-SEASON SERVICE SPECIAL: WASTE OIL HEATERS

Is your waste oil heater off? Perfect. Now's the time to clean it.

Your waste oil heater worked hard all winter. Now it's sitting idle—collecting ash, soot, and residue that, if left unchecked, can lead to serious performance problems when temperatures drop again.

That makes summer the smartest time to schedule service. Book your waste oil heater service before August 31, and get \$100 off your maintenance visit.

This preventative service includes:

- ✓ **Full System Inspection**
- ✓ **Cleaning of burner assembly and heat exchanger**
- ✓ **Ash and soot removal**
- ✓ **Safety check and performance tune-up**

**Call to Schedule Your Service:**

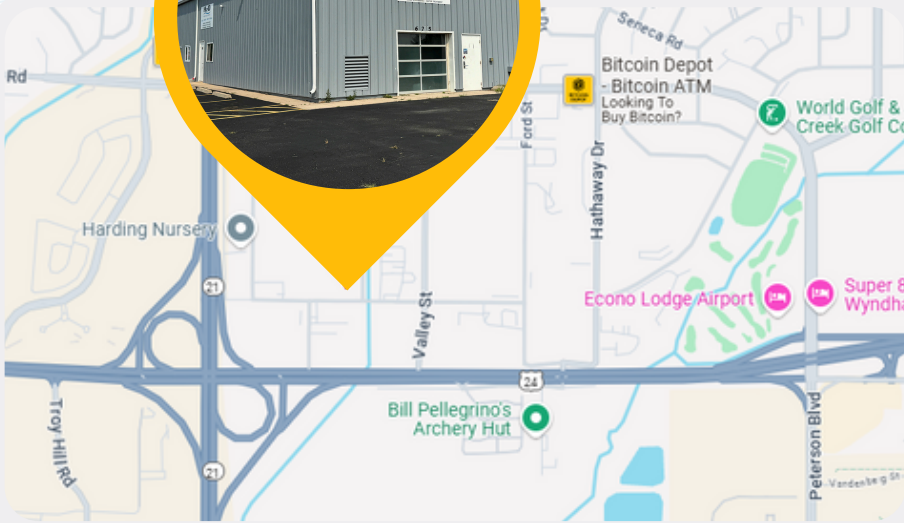

- **Denver: 303-287-7561**
- **Grand Junction/Western Slope: 970-670-5016**
- **Colorado Springs: 719-434-4779**

**Or schedule online below!**
